

# GREEN SCREEN

Media Storehouse can offer a unique and exciting concept which enables clients to fully utilise their retail space in a new and dynamic way. We will provide the technology and equipment which will allow customers to have their photographs taken in a variety of different situations to which they would not normally have access.

Examples of this includes:

- Trophy shoots with past and present silverware
- Photographs of important and often guarded access areas, such as dressing rooms and dug-outs
- Fantasy montages with your favourite players.

The equipment provided can be operated by any member of staff and requires very little training. The customer will be able to take their personal product away immediately and have the option to order reprints and different products via our website solutions.
